

MONTVIEW BOULEVARD PRESBYTERIAN CHURCH

WEEKLY UPDATE

Week of **September 17, 2021**

Choir Loft Highlight

Demolition of the structural concrete in the Choir Loft is complete. The concrete deck from corner of the Organ Bench through the sound booth has been removed and new structural steel and decking installed. The decking will be poured with concrete and become the new walkway through the Lantern above Westminster Commons to the Admin Wing. Within the Choir Loft, the new steel had to be meticulously coordinated to protect and maintain the Sanctuary, we compared this process to threading a needle. Once structure is complete, Colarelli Construction will put the pieces of the choir loft back together, including 6' duct that supplies the sanctuary, electrical and control wiring, then new finishes. The organ will sound more stunning than ever in its new surroundings!
